Do you have your new (white) PAC yet? Yes No Do not have a PAC

Do you need help submitting your Pesticide Use Reports? Yes No Not sure

(continue to next page)

Protecting human health and the environment is one of our main objectives. With that in mind:

Do you continually evaluate, consider, and take mitigation measures to determine and address hazards to people and the environment? Yes No

Do you routinely determine the likelihood of substantial adverse environmental effects and consider alternative options to avoid unacceptable risks? Yes No

Can you identify and are you aware of any sensitive sites within, at minimum, 1 mile of your sites? Yes No

Do you consider weather conditions, schools, neighbors, drift, etc. prior to every pesticide application? Yes No

What actions do you take to mitigate drift? _____

What are your anticipated pest problems for each crop?

Do you need copies and/or more information about Pesticide Safety Information Series leaflets? Yes No

Do you need help obtaining pest management guides? Yes No

Site changes/Notes:

Per 3CCR section 6432, we determine if a substantial adverse environmental impact may result from the use of a California Restricted Material, and if there is a feasible alternative, or feasible mitigation measure available that would substantially reduce the adverse impact. If the Commissioner determines that there is not a feasible alternative or feasible mitigation measure which significantly reduces the environmental impact, the permit or intended pesticide application shall be denied or conditioned on the utilization of the mitigation measure. Our permit evaluation program complies with CEQA and the requirements of 3CCR section 6420 – 6444.
